1. Introduction

Our project Vidhi Vidhan is a Web-service that lets users book and simplify the tasks listed whenever there is a spiritual event or ritual. The service connects all the vendors as well as required people such as priests to the users. Using our service can help the users complete all the tasks and and the needs of necessary items.

1.1 Purpose

The Purpose behind this project is to avoid non-certified or fake services that can be critical towards the ritual.

1.2 Scope

(1) This project will connect the user to the services like flower vendors, hawan wood vendors, persists and all the necessary small level shops/merchants who are difficult to locate at certain events.

(2) The software will connect them both and from here they can finalise a date as well as vendor who will provide them the necessary service for the day and apart from this they can also select a complete package for common events such as all the rituals for inauguration and other common rituals.

(3) Apart for this the project is not only limited till here but this can be further taken to educational sessions about the importance of rituals and all those events which are decided for the day.

1.3 Definitions, Acronyms, and Abbreviations

This subsection should provide the definitions of all terms, acronyms, and abbreviations required to properly interpret the SRS. This information may be provided by reference to one or more appendixes in the SRS or by reference to other documents.

1.4 References

This subsection should:

(1) Provide a complete list of all documents referenced elsewhere in the SRS, or in a separate, specified document.

(2) Identify each document by title, report number - if applicable - date, and publishing organization.

(3) Specify the sources from which the references can be obtained.

This information may be provided by reference to an appendix or to another document.

1.5 Overview

This subsection should:

(1) The other part of the SRS contains all the technical and minute information about the project and their information.

VIDHI VIDHAN

(2) The SRS is organised with subsections and theirs indexes to be easily readable and have a idea of the project as soon as possible.

2. General Description

The project is going to find for genuine service provider and by service providers we believe genuine priests because we can see many people disguising them in persist for their personal interests. This will help them locate genuine people and get their ritual done because in Hindu/Sanatan religion the value of any ritual or spiritual event or function is incomplete without a brahmin priest.

2.1 Product Perspective

Through this project we can also help the priest find their real value where their knowledge and devotiion is taken care of and they get what the deserve.

2.2 Product Functions

Our project will now function on a platform which will have the necessary information of every user and service provider through which they can connect to them. Primarily they will have to connect to them manually and further this process is going to be automated.

2.3 User Characteristics

The Users will have to verify themselves with address proof and then they can browse through The platform and can search for all the service they need for the day. On the other hand the service provider have to also verify themselves and then they can mention their fees against their service.

2.5 Assumptions and Dependencies

In this project we are assuming that the local shops/merchants have the visibility of delivering small requirement to the users without loss. Additionally we can say that our project is limited till connecting the two users at a mutual need ut not proving the actual service online which can be done through vide calls, etc.

3. Specific Requirements

The Specific requirement of this project includes the dense network of all the vendors in order to provide a variety if same services to the user. Along with this we aim to connect to each and every service provider at physical level and explain them and make them comfortable about this project.

Apart from this we also need to take care of the ritual event until is it completed as because spontaneous retirements can also arise.
